

## **TURMOPAST TAS-FM**

### **LUBCON-Metal-Free Paste up to +1200 °C**

LUBCON-anti-seize products of Series **TURMOPAST TAS-FM** are white lubricants and separating agents up to +1200 °C. This lubricant as paste and fluid is a combination of solid lubricants in a synthetic carrier oil which evaporates without leaving any residues at high temperatures. It prevents corrosion and burning in and ensures easy breakaway movements.

#### **Quality Features**

- Temperature range from -40 °C to +1200 °C (from +200 °C the pasty lubrication passes to a dry lubrication)
- Extremely high pressure absorption (10.000 at/cm<sup>2</sup>), permanent separating effect under static load
- low coefficient of friction
- Protection against fretting corrosion

#### **TURMOPAST TAS-FM**

Soft paste, without dropping point, very adhesive

#### **TURMOPAST TAS-FM Fluid**

Semifluid lubricant to be applied manually, by oil can or by automatic lubricators

#### **Application**

For screw-type connections, low-speed bearings, cam disks, spindles, return rollers, large-link plates and hot moulding operations
